Remark on board Bark Alice Frazier
New Bedford Sept. 10th 1851
(Wednesday)

Bidding farewell to my native home and heaving a long sigh I stepped on board the Pilot Boat, and was soon gliding down the harbor of New Bedford; A few hours sail with a light wind brought us alongside of the Bark Alice Frazier then beating out of the Harbor on her way to the Artic Ocean on a whaling voige—; arrived on board about 10 o'clock ahead found all hands busy tacking ship. I will not attempt to discribe my awkwardness in endeavoring to fulfil orders, which although in plain English were as unintelegable as if they had been given in some unknown language; After beating about for most of the day we were obliged to drop anchor off Pune a dense fog making it dangerous to continure on our passage; brother Andrew & Otis & cousen Charles were obliged to stop on board that night and part of the next day; that night I stood anchor watch with boat steerers.

The Bark Alice Frazier is 406 tons burthen with the capacity of 2800 barrels oil; three years old and built for the merchant service in which she has been employed for the last three years; well found in sails, riggin, provision &c for the time estimated for sitting out.

The crew consist of Captain three mates four boat steerers Cooper Carpenter Steward, Cook three boys and twenty foremast hands, all greens hands; in addition we have as parengers the Capt. wife and two Children, and the firsts mates wife; and the agents ~~wife~~ son; which makes in all 40 soles, saying nothing of the dogs and chickens

September

Thursday 11th 1851

At 2 P.M the weather cleared up, we got under way and were soon upon the bosom of broad Atlantic Ocean having discharged our pilot and decks cleared up all hand were summoned ~~up~~ aft and devided into two watches, myself chosen in the larboard or mates watch after which the Captain addressed us with a few remarks stating the duties &c.

Friday 12th 1851

Calm. saw several sword fish - lowerd, starboard boat and struck one but did not succeed in getting him; all hands engaged in fitting boats, fitting harpoons, spades, lances, and other instruments used in taking and cutting in whales.

Saturday September 18th

Lat 2° 48' Fresh brezes from N E W - land ~~in~~ no longer in sight, Steering East, three sail in sight

Sunday 14th 1851

This day commences with fresh brezes from W. steering E by S. All hands called aft and devided into boats crews, myself chosen bow oarsman of the starboard or Captains boat. At 2 o clock P M. the wind hawled N N E and blowing a perfect gail; ship laid two under close reefed fore & main topsails and fore top mast stay sail, To day I feel symptons of sea sickness, now I see the differance between the light house schooner & this ship there I could go below when I felt sea sick but here you have to keep on deck & do your duty as if you were well.

Monday Sept 15th 1851

Wind abaiting a little; we shook out one reef out fore & main topsails; steering E.

Tuesday Sept 16th 1851

Wind increasing again, under close reefed topsails, all hands in the forecastle sea sick except two. some of the men would give all they possessed to be on Terra Firma again.

Wednesday Sept 17th 1851

Still laied two under close reefed topsail; a heavy sea on

Thursday Sept 18th

Weather moderating; all sail set, all hands engaged setting up rigging &c.

Friday September 19th 1851

Light breezes from N. heavy sea rolling

Saturday September 20th 1851

Light baffling from N. N. E to E. steering East and all hands engaged in ships duty.

Lat. Lude 38° 10'
Longitude 56°. 0'

Sunday September 21. 1851

Light wind from the NE. N.. E.. Lowered boats after Blanck fish, and after pulling three or four hours were obliged to come along side unsuccessfully.

Lon 34°29'

Sunday October 5 1851

Lat Strong breezes from S.S.W; steering E by S; all sail
37°2' set. Land Ho! cries our Captain from the
Long top of the forecastle, and a moment more brought all
31°26' hands on deck looking for land; Flores (one of the W. Isles
Islands) soon came in sight, and at sun set we were able
to discriminate objects quite distinctly.

Monday October 6. 1851

Lat
39°28' Calm, between Flores and Corvo saw three sails laying
Long off and on Flores.
31° 02'

Tuesday October 7. 1851

Light winds from S.W steering S.E for Fayal; at night full
saw Fayal and Pico 40 miles distant.

Wednesday October 8. 1851

Light breezes from S.E beating up to Fayal

Thursday October 9. 1851

Lat. beating with short winds, saw Pt. Giness at 2 o'clock
P.M. when within about 10 miles of Fayal, the Captain
ordered the Starboard boat to be cleared away, and
selecting a boats crew (myself with the number) lowered
and after five or six hours strong pulling landed to the
[illegible] remarks relative to this [illegible]

I sound may not be amiss at this time; this group was discovered in the year 1434 by the Spanish and subsequently passed into the hands of Portugal to which government they now belong; these Islands were visited by Christopher Columbus in 1492 previous to the discovery of America and many assert that Capt Kidd the notorious pirat once lived at Fayal. Fayal is the principle commercial port, and is visited by allmost all American whale ships; the American consul resides here and is considered almost supreme by the inhabitants. Port Delgada on Isle of St. michaels is the Capital of this group; here the Governer and the principle officers reside. There are nine Islands consisting of Fayal, St. Michaels, Pico St. Georges St. Marys, Corvo Flores Graciosa.

Friday Oct 10. 1851

Still ashore - a gail of wind having driven our ship to the leward of the Island; we spent the day in visiting places of interest on the Island.

Saturday Oct 11. 1851

This morning the wind some what abated; and the ship heaving two in sight the Captain ordered us to be ready to go on board; arriving on board we found a boun boat discharging recruits; which consisted of potatoes, Cabages onions, oranges &c.. 2d Mate went ashore to discharge two men that were sick, and ship two in their places; soon after the wind increased we were driven far to the leward of the Island; the 2d mate attempted to board but the sea rolling so high he was obliged return.

Sunday Oct 12. 1851

Laid to under closed reefed canvis; raining equally.

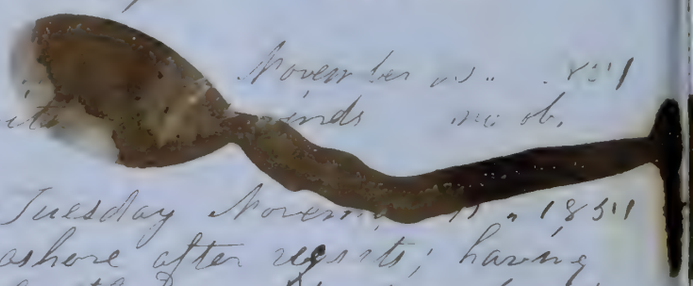
Light Trades Pt. Jago in sight — No observ.



November 10. 1851

Bearing up to Pt. Jago with ... winds ... ob.

Tuesday November 11. 1851

Lowered two boats to go ashore after recruits; having been ashore at Fayal while others remained on board to work ship. I was not among those that went ashore. Our recruits here were Oranges, Bananas, Cocoanuts & limes which are produced here in grate abundance and of the finest quality; and in addition we procured a number of Hogs, Turkies & Chickins; while the boats were ashore we were under the necessity of performing the funeral services over, and consigning to Davy Jones our friend & Companion old Towzer the sea not having agreed with his dog nature — this bereavment was felt deeply by all on board; his society was ever welcome during the long and tedious ~~watch~~ night watches upon deck, enlivening us by his sagacity and playfulness, and as he sank to rise no more beneath the billows, all eyes were dimmed with a tear, and heaving a long sigh we turned from the bulwark with sorrowfull hearts. Having secured our recruits on board we spread away, ~~in~~ setting fore t'gallant studding sail and lower studding sail soon left Pt. Jago buried ~~in obscurity~~ in the horizon. Fine ob.

Having delayed writing while doubling Cape Horn I will now write ~~it~~ here a general account of our passage around it. We were kept off here four weeks with head winds and bad weather. When we ~~first~~ were in the latitude of Cape Horn we had very fine weather such as is not very often seen in this latitude, as I was told so by the Capt & chief mate; but we had to run to the southard of cape Horn to clear the Cape Horn Islands or Isle Cape Horn and after we had got clear of these Islands we put to the westard and after this we experienced very bad and heavy weather and heavy squals comming up, ~~which~~ ~~kept~~ kept us busier ~~for~~ handing sails. we endured hard ships such as is not experienced by landsmen, and although ~~that~~ it was the middle of summer it was very cold and the gally was a great deal of resort.

by the crew, we beat to the westard and Northard for four week, and at last was lucky enough to git a fair wind when we put out standing sails and squaired away for St Carlos a town on Chilo Island in a fog, at night we were off the Island. the Capt never having been there did not know the way to enter the harbor; and we arriving there just at night and a thick fog comming up we put off intending to lay off and on which we did do for three days; when the fog clearing up we found ourselves about twenty miles to the leward of the Island and about the same distance from the main land. we then squared away [redacted]

Page [redacted]

Monday Feb 2 1852

Fresh breezes from S.W. heading in for the land; there blows! proved to be a sperm whale going to windward; lowerd larboard and waste boats and put chase to them and lost sight of him after pulling four hours dead to the wind ard and a heavy sea on; we then came aboard and got our breakfast; being my watch below I had just got turned in when they raised sperm whales to the leeward; we down the same boats again I pulling the bow oar in the mates boat; the 2nd mate got on to the whales and the boat steerer darted but did not fastned; the whales then went to windward leewards called the bow boats then lowered and got on but did not fastned; all hands felt down hartedly; about eliven o'clock P.M. spoke the Awashonks of Falmouth and gammed with her. [redacted] South

Longitude " 76° 50' West

Tuesday February 3 1852

This day commences with calms; land in sight ahead afternoon wind right aft; setting standing sail, and put in for the land expecting it to be the Island of Chiloa containing the town of St Carlos; we were not long in reaching the land and sailing along the coast we rounded the town which we thought was the right one; about eight bells or seven o'clock a thick fog setting in we kept off the shore.

Wednesday February 4. 1852

Thick foggy weather laying off and on, on account of the fog.

Thursday February 5 1852

Still laying off and on thick fog cannot enter the harbor the latter part of fog cleared away, the land in sight.

See Cape Horn page 18

Journal on board the

Friday February 6 1852

The wind is still fair; one sail in sight, the Capt. thinks her to be a sloop of war; all kinds of whales have been in sight to day Grampuses, Sulpher bottoms Humpbacks, and fin backs heading along the coast.

Saturday Feb 7. 1852

Strong breezes from the S driving us ahead at a rate of 10 not; fair and pleasant; whales in sight but not of the right kind.

Sunday February 8 1852

A pleasant sail from right aft hauls out wind to the S steering to the northward; luffed the ship up and brought the wind off the beam; we then shortned sail, and put her in towards the land latter part wind abaiting; set more sail. two sail in sight.

Latitude by obs 28° 18 S.
Longitude " Chr 74° 11 W.

Monday February 9 1852

Land in sight the coast of Chilli light winds and fair to the southard; heading in towards the land, watch engaged in working in riggin.

Latitude by obs 32° 21' S.

Tuesday Febr 10. 1852

Running along shore fair wind two sail in sight; mid the part almost calm waiting for a breeze to enter the harbor

Wednesday February 11. 1852

Wind breezes up; within 6 miles of Valparaiso lowered starboard boat and pulled ashore, 5 of ~~crew~~ crew went ashore it being ~~short~~ my boat; we stopped ashore about half an hour and I had a chance to see the town; we then went aboard all but the Capt.) and ~~stood~~ brought the ship up to the Harbor and anchored her about two miles from the piers along side of the Canada & Eliza Adams both from New Bedford; after supper a boats crew from the Eliza Adams came aboard; amongst them I found an old acquaintance Bob Caswell; the third mate ~~and~~ some more of the crew and myself went ashore to find Mr Potter, called to Messrs Potter; he is runner here and is making a great deal of money.

Remarks on Valparaiso

Valparaiso is one of the largest sea ports on this coast it is a town on the coast of Chilli containing between twenty and thirty thousand inhabitants population a mixture of Spanish portegees; the town on several hills and is intirely exposed in time of war to the guns from the vessells in the harbar; it is very well defended by the Fort and guns on planted on the different bluffs of land. the harbor is a very good one to enter and a safe one needing a pilot to bring you in; the water is very deep, being thirty fathom where we anchored and is deeper in some places. There were two hundred ve sells in here belonging to different nations when we were here; but there is sometime four hundred in here as I was told; a great many of the merchant men and war ships that have business in this Ocian enter here for requits, and some whalers; there is two English Store ships here that stay here all the time here a great deal of the inland trade is carried on here; the provisions and fruit are the same as they are at home,

Thursday February 12. 1852

Laying in port taking in water; boats along side taking with fruit trading with the crew for tobacco.

Friday February 13. 1852

Laying in harbor about two o'clock P.M. two of the crew Jacob Smith and John Trainer swam away by swimming ashore, they were discovered in the act and one of them taken and put in irons, the one taken was John Trainer the other escaped; latter part of the day engaged in taking in water.

Saturday February 14. 1852

Still at anchor, the fore part of the day engaged in taking in vegitables; about four o'clock P.M. the Portuguese crew attempted set fire to her, but the fire was discovered and the in time. the ring leaders were found and secured up in the riggin; one the Capt Smith by name put to sea with them, on board of the Canada 4 of the men refused to do duty and they were put in irons down in the run; some of our crew went and helped them get under way; we then put to sea with a strong breeze from S.E. heading N. W by W.

Remarks

At Valparaiso discharged the fore castle passengers and one of the boat steerers here.

Journal of the

Sunday February 15. 1852

Journal on board the

Sunday March 28 " 1852

First day commences with rain squalls, winds variable
Course W. the Island of Oahu on the larboard side
and the Island of Mauie on the Starboard side;
this day as we were ~~to~~ tacking ship; in the act of bracing
up the main yard the Halyards of the fore top sail
block parted all the tie parted and the blocks and main
came by the run on deck; the chain struck the mate on
the head, and the runner block striking him knocked
him down on deck. the chain cut him on the head
~~very~~ bad ~~—~~; it was a great mercical that he did not
get killed.

Monday March 29 " 1852

Declared between Owaii and Mauie; several sail
in sight; took the Starboard anchor off the bow
the Island of Hawaii is the island where Capt Cook
was killed, there is a burning mountain on it some miles
high the top is covered with ice and snow all the year
round, the tip of it extends far above the clouds.
middle part usually with rain; latter part wind
up ~~—~~ not blow fresh; running up the Island with
a fresh breeze; several sail in sight. spoke one from
Fair Harbor and yarned with her. the land of this Island
very high several thousand feet above the sea,
at 4 PM we got the chain up and sent the anchors.

Tuesday March 30 " 1852

A fresh breeze from the S.E. off Mauie running up
the shore to the town of Lahaina, nine or ten sail in
sight, and several of the smaller Islands of the group
the Alice Mendel, Good Return, Origenlo and others
from New Bedford the Tuscanny of Sag harbor, Nat. Gibbs
from Nantucket ~~—~~ all in sight, came to anchor about
nine o'clock A.M. in the harbor of Lahaina with the rest of
the fleet; a boat from the Good Return came on board
after we had got the decks clear; in which I found
two acquaintences George Wilson & Peleg Gifford.

Wednesday March 31 1852

In the harbor of Lahaina Starboard watch on shore
the other watch engaged in cleaning ship on outside

Saturday Jan 8 d 1853 Monday January 10 1853

Light winds from the S.E. today one of our ship mates departed this life after a sickness of one week; after finishing the last duties we owe to the dead; the mate, read his funeral service, and he was then launched into the fathomless deep, never to be seen by mortal man again. Lat 12° 80' S Long 146° 10' W.

(continued page 24)

Remarks

We arrived in Oahu harbor the first part of February 1853 painted ship fitted the rigging and put every thing in order for the Artic Ocean; got two casks of water aboard some bread & meat belonging to the ship; we had about three days liberty for each watch, one watch doing the work aboard the ship while the other is a shore on liberty, here we discharged our mate and put Thos Morgan 2d mate in his place, and shiped Mr Smith for 2d officer in command; we also shiped seven natives of Oahu in the place of some of our crew which were discharged and others that run away or deserted; all of our crew being shiped and the ship being provided with every thing necessary for an eight months cruise in the northern seas; on the 7th March 1853 we hauled the ship out around the other shipping, and at 9 a m

inches Journal on board
anchor and waited for the Captain and Pilot to come
aboard, about 10 P.m they came aboard, we then up
anchor and put out the harbor with the fresh trade
winds on our quarter, in a few minutes we were outside
of the Harbor. the pilot then took leave of us and we then
headed our course for the N.E and steered for Attoi Island
one of the same group, and the next day the 10th of March
about 10 P.m we were off the Island; we then lowered
the boats and went ashore and brought off about 10
boat loads of wood

The Bark Alice Frazier

1854

Tuesday May 22

This day begins with wind from the S.E. with foggy weather, under all sail steering for the land. At 6 P.M. in the passage again. At 7 P.M. through the passage into the Okhotsk Sea. employed pumping ship. two sail in sight. Middle part light baffling winds weather stormy with snow. Latter part blowing a gale from the N.W. weather uncommon bad with a strong snow storm. ship on a lee shore under a strong press of sail but unable to weather the land being into a bight of the land she cannot proceed on either tack without fear of going ashore in a few minits the weather so thick with snow & fog as not to enable us to see objects 1/4 of a mile distant. The ship is in a very dangerous situation unable to weather the land or to bring the ship to the wind to lay to and not knowing how to steer to run out of the Sea into the Pacific Ocean on account of the fog the Capt. consults his officers on his situation and decides to run the ship for the passage as near as he can judge where the passage lays. having been shut in by a thick fog ever since we came through.

The Capt. therefore trimed the yards & run the ship S.E. expecting this chance of clearing the land very small all hands on board were in the greatest anxiety as to the result of this expedient, which appeared in the minds of all the only one to be taken and even this gave us little hope. it was 7 A.M. when we put the ship before the wind and acted with an full sussepence of late. after an hours run and ancions soaking we judged ourself clear of the land. but did not bring the ship to the wind till some time after. Thus by the help of Providence we were rescued from the awful fate which but a few moments before seamed inevitable.

No observ'n to day.

So Ends.

Journal on Board [illegible]

1854.

Wednesday May 3d

First 5 or 6 strong gale from the N.W. sending before the wind running out of the Okhotzk Sea after running 4 or 5 hours under double reefed top sails & fore sail. Brought the ship to the wind, feeling grateful to Providence for our escape from the awfull fate of shipwreck. Middle part lying to under double reefed topsail blowing a gale weathers clear;

Latter part blowing strong from the W. made sail steering to the N. close hauled on the wind.

Wednesday Jan. 3d

First part fresh trade and pleasant weather all hands employed working ship to the weather part of the island; at 8 P.M off the passage to the anchorage hove to brought the ship to the wind with the head sails to the mast and lay there until day break; at 3 A.M trimed the sails and entered the passage; at 6 A.M took a pilot and at 9 A.M we were anchored in the harbor of Tongatabo.

Alice Frazier lying at anchor in the harbor of Tongatabo Island one of the Friendly group.

Barque Alice Frazier. 1853

Remarks,

The Bark Alice Frazier is now lying at her anchors at Tongatabo in the Van Diemans Roads; recruiting ship with would, fruit & vegatables; This island situated in the South Pacific Ocean latitude 21°. 6'S longitude 175.54 W is very fertile; it is of the Friendly Islands and produces all of the fruits appertaining to the Tropical climates; the inhabitance are very hospitable to strangers but are much inclined to a thieving disposition, but not so much as in other Islands I have visited. what is most remarkable among the natives their women are very chast and modest;

This island is governed by its own King but the French nation are about to hoist their flag against the will of the natives while we were lying here there was a French frigate and French steam naval ship came in here and held several meetings with the King in relation to privileges to be given to the catholic missionnarys;

The French nation are very much disliked by the Friendly Islanders and by all the native inhabitants of Polynesia in general; we were here five days trafiking with the natives for water fruit &c.; Tobacco & cloth are the principal articles for trade; the clothing they make themselves is the same as made by all the natives living in the tropical climates there houses are the best instructed of any that I have seen made by savage ingenuity being made of bamboo they present a fine appearance to the stranger; not so gloomy and savage looking about them as those built by the Sandwich Islanders, Locally. King mill groups and others I have visited. There are several English inhabitants here who make cocoanut oil and sell it to the many trading vessells the come here. At the ends of five days having obtained all that we came for from the Island and the ship being ready for sea we weighed our anchors from the Van Diemans Rode and set sail from Tongatabo on the 9th of January for Sydney. Enough.

Journal on board the

1853

Tuesday January 4

This day at 10 am took in anchors, and set sail with a pilot on board to take us out of San Fernando Road and from the E. Shore & head wind working ship in the open and out of the Roads, Latter part the same;

Wednesday January 5

First part strong, & Trade wind and cloudy weather; ship in San Fernando Road working out to sea with the Pilot on board; at 1 pm put side the Pilot in the board & pacific Ocean; cleared a boat and put the pilot in shore, after the boat came alongside took the boat in the tackles trimed the sails and shaped our course for Sydney; all hands employed stowing anchors and cable; at 4 pm blowing a moderate gale handed the topgallant sails and reefed the topsails and increased middle part strong gale ship lying to under a close reefed main topsail and fore topmast staysail; at 10 am the sea took away the starboard boat and the force of the gale sprung our main yard. Latter part strong gale ship lying to.

the Bark Alice Grazier

1855

Monday Jan 21

Today gentle breezes from the N and pleasant weather at 5 Am land in sight, (East coast of the Island Australia or New Holland) at 12 m off the Heads at the intrance to Port Jackson at Sydney lying off the heads for a pilot. 9 Knots.

Tuesday Jan 30

Today begins with fresh wind from the northward; at 1 Am took a pilot and with a fair wind run up to the anchorage at Port Jackson at Sydney at 3 PM anchored our Bark, 6 Fathom Water;

Remarks.

The Bark Alice Grazier came to anchor in Port Jackson at Sydney on the 29th of January with time on shore; She came there with the intension of disposing of her cargo at a good price; She lay there for twenty four days the Capt and myself ashore every day endeavoring to sell the oil but not being offered a price that we thought suitable we made up our minds for leaving on the 10th of February; but just as the Capt had formed this intension he was offered a good price for his oil and sold it; he was then detained several days to obtain his money; and on the 22d of Feb the Capt gave orders to get the Bark underway; (having obtained about 1/2 of his money; the remainder he was to receive at Melbourne providing he would take his cargo there on terms agreable to the parties.) So about 10 Am on the 22d of February we weighed anchor, took a pilot set sail and proceeded out of Port Jackson with a strong wind from the eastward; at 2 PM out side of Port Jackson Heads on our way to Melbourne; While lying at Sydney we lost 3 men by desertion; on the 21st of Feb we were run into by a steamer and lost our Fluke boom;

Bark Alice Grazier

1855

Remarks

The Bark Alice Grazier came to anchor in Hobson's Bay in the evening of the 28th of February, after 6 days passage from Melbourne; March 1st Harbor Pilot came on board and got the ship underway again and moored us among the other shipping, Capt and myself on shore; on the 3d of March engaged a tow Boat took a Harbor Pilot on Board who moored us to the Rail Road Pier at Sandridge about 2 miles from our last anchorage; here we discharged one hundred ton or about nine hundred and fifty bbls of Polar Oil we were here ten days then took a Harbor pilot & a tow boat which took us back to our old anchorage wher we discharged the remainder of our polar oil on board lighters & coasting vessells; after discharging the oil the ship was detained about one month; on account of the Capt not receiving payment for about 9/10 of his cargo; during the time we lay in Hobson bay I was ashore about every day on business with the Capt; in this port six men deserted, and the second mate was discharged, the Capt did not ship any seamen in their places we were therefore short handed being 9 men short of what we sailed from the Sandwich Islands with; having on board only ten foremast hands to take the ship home; on the 9th of May the ship being ready for sea, and the Capts affairs all straight we weighed our anchor from Hobsons bay with a small crew although we had 3 landsmen aboard who were to work their passage home; besides we had a Stewardess on board, took the pilot about 8 A.M. obtained a steam tug boat to take us outside the shipping; at 10 A.M. outside the shipping set the sails and steered for port Philip Heads with a strong wind from the S; when within about 6 miles from the Heads hauled to the wind & drop our anchor; on account of the wind and tide being ahead.

Bark Alice Fraser

On the Dark Blue Sea

1st

Willie's on the dark blue sea,
He's on the raging main,
And lonesome days and nights;
O, he's my manly swain.

Chorus.

Thunder clouds may rise
O're the dark blue sea
But the storm king stay his hand,
And bring my Willie back to me
To his own dear native land

2nd

I love my Willie best of all
He ever was true to me
And lonesome dreary hours have passed
Since he first went to sea

3d

I see the vivid lightning flash
I hear the thunder roll
O! Father save my Willie from
The storm king's wild control

4th

But ere she spoke the storm had ceased
The heavens no longer mourned
And Willie clasped her in his arms
To roam the sea's no more
